Academic Program and

Academic Program and Course Description Guide

2024

Internal Use

Introduction:

The educational program is a well—planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staP together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quaJerly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

<u>Academic Program Description:</u> The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description:</u> Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision</u>: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission</u>: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra— curricular activities to achieve the learning outcomes of the program.

Internal Use

1. Program Vision

The College of Nursing seeks to be one of the most prominent colleges in the health and scientific fields by following the approved teaching systems and academic programs. It also aims, through its programs, to produce generations of university nurses with a high degree of competence and creativity.

2. Program Mission

Working to prepare and graduate leading scientific competencies in the health fields and to develop knowledge building in the field of scientific research to serve society, as well as training and refining the minds of students scientifically and cognitively, and emphasizing social, cultural and scientific values.

3. Program Objectives

1. Teaching students a set of methods and steps that provide them with a general idea of writing research correctly

2. Preparing a cadre of graduates with scientific and practical capabilities to identify ways to help the nurse produce any research work with a high degree of efficiency and the correct practical approach.

3. The university nurse uses experience to formulate medical and scientific information and include it in research and texts well.

4. Developing purposeful and educational nursing programs by the nurse for the patient

4. Program Accreditation

Learning Outcomes Statement 5

9. Teaching and Learning Strategies

1- Pay attention to writing the research correctly.

2- Arranging the work steps and required materials.

3- Determine the approved priorities in terms of paying attention to previous studies and theories and adopting them

10. Evaluation methods

Weekly, monthly, daily exams and the end of the year exam
